

## Auto Pilot

### SA-10 series

Tight course holding, rugged construction, versatile steering/navigation parameters, yet very simple operation. SA-10 offers what professionals expect for an auto pilot.

SA-10 series auto pilot is based upon the successful heritage of our 3000AT series that is renowned for performance and reliability.

### SA-10 Operator Console

Auto Pilot electronics, display and controls are all housed in this cabinet.

No junction box or distribution box is required.

### SA-101P Panel Mount Control Head

Easy to install and mount into the consoles of a variety of steering room layouts.

Dial steering control (F.F.U.) is fitted as standard.

### SA-101 Wheel House Unit

Auto Pilot control head is inlaid into a 150mm steering compass binnacle.

Top quality 150mm steering compass with full deviation correctors.

Space saving and easy installation.

SA-101 is a complete auto pilot and steering compass package in a single binnacle enclosure.

Space saving and easy installation.
