Sound Powered Telephone(LC-800)

Marine Sound Powered Telephone(LC-800)
Battery less Telephone System

GENERAL DESCRIPTION

Sound Powered Telephone system is used for communicating with the wheel house, the engine control room, and the steering gear room in case of emergency and for communicating between the areas or rooms when necessary. Especially, being independent from the power supply of the vessel, this system allows for emergency communication at critical spots in the vessel even in case of power failure. It is manufactured to be a waterproof and dustproof appropriate for the vessel, and adopts the input power supply of 24V DC to deliver communications and signals (Bell, Lamp, Etc.). **This system includes the following types** : Flush, wall, waterproof, portable, and intrinsically safe (Used for normal condition or in the area with the possibility of explosive gas in case of accident) types, all of which can be interfaced to the Horn/Bell/Flashing Light, and the Foot Switch.

The system was tested at the IEC60945 standard and approved for CE by CCS, RINA and DNV
